Can I pass my test with your CyberArk Certification CAU310 practice questions only?

NEW QUESTION: 1

Azure仮想マシンでホストされているSQLServerデータベースのデータベースバックアップソリューションを構築しています。

Azureの地域が停止した場合は、データベースのバックアップを復元できる必要があります。ソリューションはコストを最小限に抑える必要があります。

バックアップにはどのタイプのストレージアカウントを使用する必要がありますか？

- A. locally-redundant storage (LRS)
- B. zone-redundant storage (ZRS)
- C. geo-redundant storage
- D. read-access geo-redundant storage (RA-GRS)

Answer: D

Explanation:

Geo-redundant storage (with GRS or GZRS) replicates your data to another physical location in the secondary region to protect against regional outages. However, that data is available to be read only if the customer or Microsoft initiates a failover from the primary to secondary region. When you enable read access to the secondary region, your data is available to be read if the primary region becomes unavailable. For read access to the secondary region, enable read-access geo-redundant storage (RA-GRS) or read-access geo-zone-redundant storage (RA-GZRS).

Incorrect Answers:

A: Locally redundant storage (LRS) copies your data synchronously three times within a single physical location in the primary region. LRS is the least expensive replication option, but is not recommended for applications requiring high availability.

C: Zone-redundant storage (ZRS) copies your data synchronously across three Azure availability zones in the primary region.

D: Geo-redundant storage (with GRS or GZRS) replicates your data to another physical location

in the secondary region to protect against regional outages. However, that data is available to be read only if the customer or Microsoft initiates a failover from the primary to secondary region.

NEW QUESTION: 2

A company has an Active Directory Domain Services domain that contains a SharePoint farm. The farm contains a site collection that displays data from an employee information database. You define a domain user account named HRUsers and configure the account to have read-only permissions to the database. You have the following data access requirements for the employee information database:

Members of the Human Resources department must be able to view data by using SharePoint, without entering database credentials.

No other SharePoint users should be able to view the employee data. You need to meet the requirements.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Enable site collection reporting.
- B. Create an external list that displays data from the employee information database.
- C. In the Secure Store service application, define a target application by using an individual mapping.
- D. In the Secure Store service application, define a target application by using a group mapping.
- E. Enable the Reports and Data Search Support site collection feature.

Answer: A,B,D

NEW QUESTION: 3

PardotとSalesforceの同期はいくつですか？

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B
