Our EX283 guide torrent can simulate the exam and boosts the timing function.

NEW QUESTION: 1
Refer to the exhibit.

Server 1 and server 2 are on the same VLAN but cannot reach each other. Which option describes the reason?
A. VLAN is not allowed on the peer link.
B. Interface VALN (SVI) must be configured for this VLAN.
C. Type2 inconsistency prevents the communication.
D. VLAN is not on FabricPath mode.
Answer: D

NEW QUESTION: 2
You want to use the Forms Debugger to diagnose a problem with the RAISE_STATUS program unit that is stored in the database.
Forms Builder, you set a breakpoint in the stored code, and then run the Human Resources form in debug mode. You click the Raise_Salaries button, which has a When Button Pressed trigger that calls RAISE_SALARIES.
However, you are unable to see the RAISE_SALARIES procedure when you step through the code, and it does not appear in the stack frame. What could be the reason for this problem?
A. The breakpoint should have been set in the When-Button-Pressed trigger, not in the stored program unit.
B. The stored program unit was not compiled with the debug information included.
C. You cannot use the Forms Debugger to diagnose problems with stored program units.
D. You are not connected to the database.
Answer: C
Explanation:
Explanation: The Forms debugger can only step through Forms side code, not database side code. If you Form calls a database procedure, you will not be able to see what it does through the Forms debugger.

NEW QUESTION: 3
Scenario
Refer to the topology.
Your company has connected the routers R1. R2. and R3 with serial links.
R2 and R3 are connected to the switches SW1 and SW2, respectively.
SW1 and SW2 are also connected to the routers R4 and R5.
The EIGRP routing protocol is configured.
You are required to troubleshoot and resolve the EIGRP issues between the various routers.
Use the appropriate show commands to troubleshoot the issues.

Which path does traffic take from R1 to R5?
A. The traffic goes through R3.
B. The traffic is equally load-balanced over R2 and R3.
C. The traffic is unequally load-balanced over R2 and R3.
D. The traffic goes through R2.
Answer: D
Explanation:
Using the "show ip int brief command" on R5 we can see the IP addresses assigned to this router. Then, using the "show ip route" command on R1 we can see that to reach 10.5.5.5 and 10.5.5.55 the preferred path is via Serial 1/3, which we see from the diagram is the link to R2.
