NEW QUESTION: 2
You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm.
You create a Web Application that supports only forms-based authentication.
You need to index the content of the Web application.
What should you do?
A. Change the Authentication Type settings to web single sign-on.
B. Create a new crawl rule.
C. Run the get-spwebapplication cmdlet and specify the UseClaimsAuthentication Parameter.
D. Change the Search Service account.
Answer: B
Explanation:
You can add a crawl rule to include or exclude specific paths when you crawl content. When you include a path, you can optionally provide alternative account credentials to crawl it. In addition to creating or editing crawl rules, you can test, delete, or reorder existing crawl rules.
Specify authentication credentials. If a site to be crawled requires different credentials than those of the default content access account, create a crawl rule to specify the authentication credentials.
