NEW QUESTION: 1

You are designing forms for a company that has a new Dynamics 365 Sales implementation. Three departments need specific fields on the main form so they do not have to fill out multiple forms.

Each person should see only the fields they need.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

You are designing forms for a company that has a new Dynamics 365 Sales implementation.

A. Create three forms for all departments. Add all the fields. Add field-level security to fields not needed for each group.

B. Create one form for each department. Add only fields needed on the form for each department. Assign the appropriate security role to each form.

C. Edit an out-of-the box form. Add extra fields. Give all departments security roles for that form.

D. Create one form for each department. Add all fields needed for all departments. Use business rules to hide fields.

Answer: D

NEW QUESTION: 2

You create a multi-class image classification deep learning model that uses a set of labeled images. You create a script file named train.py that uses the PyTorch 1.3 framework to train the model.

You must run the script by using an estimator. The code must not require any additional Python libraries to be installed in the environment for the estimator. The time required for model training must be minimized.

You need to define the estimator that will be used to run the script.

Which estimator type should you use?

A. PyTorch

- B. Estimator
- C. SKLearn
- D. TensorFlow

Answer: A
