In order to provide effective help to customers, on the one hand, the problems of our C\_TS452\_2020 test guides are designed fitting to the latest and basic knowledge.

The practice questions of Buildindustryastana can not only help you pass SAP certification C\_TS452\_2020 exam and consolidate your professional knowledge, but also provide you one year free update service.

The desktop version stimulate the real exam environment, it will make the exam more easier, Recognized as an [Certification EX220 Cost](#) experienced professional, It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and tryour best to get the related C\_TS452\_2020 certification is the best way to show our professional ability, however, the

C\_TS452\_2020 exam is hard nut to crack and but our C\_TS452\_2020 preparation questions related to the exam for it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

## **2021 C\_TS452\_2020 – 100% Free Latest Version | Useful SAP Certified Application Associate - SAP S/4HANA Sourcing and Procurement Valid Study Questions**

If you still don't find, please contact us quickly, through **Latest C\_TS452\_2020 Version** email or online chat, Save your time for efficiency study, Opportunities are for those who are prepared.

So don't worry about the C\_TS452\_2020, choose BraindumpStudy to help you, It is downloadable in PDF format, Although the three major versions of our C\_TS452\_2020 learning materials provide a demo of the same content for all customers, [SAP Certified Application Associate - SAP S/4HANA Sourcing and Procurement](#) they will meet different unique requirements from a variety of users based on specific functionality.

So you need our C\_TS452\_2020 training materials: SAP Certified Application Associate - SAP S/4HANA Sourcing and Procurement to get rid of these problems, You do not need to spend money, 10 years dedication of the C\_TS452\_2020 test questions: SAP Certified Application Associate - SAP S/4HANA Sourcing and Procurement is only for help you pass test.

Our company has done the research of the C\_TS452\_2020 study material for several years, and the experts and professors from our company have created the famous C\_TS452\_2020 learning dumps for all customers.

### **NEW QUESTION: 1**

DRAG DROP

You are monitoring a Microsoft Azure SQL Database.

The database is experiencing high CPU consumption.

You need to determine which query uses the most cumulative CPU.

How should you complete the Transact-SQL statement? To answer, drag the appropriate Transact-SQL segments to the correct locations. Each Transact-SQL segment may be used once, more than one or not at all. You may need to drag the split bar between panes or scroll to view content.

### **Answer:**

Explanation:

### **NEW QUESTION: 2**

=====  
Topic 1, VanArsdel, Ltd

Overview

VanArsdel, Ltd. builds skyscrapers, subways, and bridges. VanArsdel is a leader in using technology to do construction better.

Overview

VanArsdel employees are able to use their own mobile devices for work activities because the company recognizes that this usage enables employee productivity. Employees also access Software as a Service (SaaS) applications, including DocuSign, Dropbox, and Citrix. The company continues to evaluate and adopt more SaaS applications for its business. VanArsdel uses Azure Active Directory (AD) to authenticate its employees, as well as

Multi-Factor Authentication (MFA). Management enjoys the ease with which MFA can be enabled and disabled for employees who use cloud-based services. VanArsdel's on-premises directory contains a single forest.

#### Helpdesk:

VanArsdel creates a helpdesk group to assist its employees. The company sends email messages to all its employees about the helpdesk group and how to contact it. Configuring employee access for SaaS applications is often a time-consuming task. It is not always obvious to the helpdesk group which users should be given access to which SaaS applications. The helpdesk group must respond to many phone calls and email messages to solve this problem, which takes up valuable time. The helpdesk group is unable to meet the needs of VanArsdel's employees.

However, many employees do not work with the helpdesk group to solve their access problems. Instead, these employees contact their co-workers or managers to find someone who can help them. Also, new employees are not always told to contact the helpdesk group for access problems. Some employees report that they cannot see all the applications in the Access Panel that they have access to. Some employees report that they must re-enter their passwords when they access cloud applications, even though they have already authenticated.

#### Bring your own device (BYOD):

VanArsdel wants to continue to support users and their mobile and personal devices, but the company is concerned about how to protect corporate assets that are stored on these devices. The company does not have a strategy to ensure that its data is removed from the devices when employees leave the company.

#### Customer Support

VanArsdel wants a mobile app for customer profile registration and feedback. The company would like to keep track of all its previous, current, and future customers worldwide. A profile system using third-party authentication is required as well as feedback and support sections for the mobile app.

#### Migration:

VanArsdel plans to migrate several virtual machine (VM) workloads into Azure. They also plan to extend their on-premises Active Directory into Azure for mobile app authentication.

#### Business Requirements

##### Hybrid Solution:

- \* A single account and credentials for both on-premises and cloud applications
- \* Certain applications that are hosted both in Azure and on-site must be accessible to both VanArsdel employees and partners
- \* The service level agreement (SLA) for the solution requires an uptime of 99.9%
- \* The partners all use Hotmail.com email addresses

##### Mobile App:

VanArsdel requires a mobile app for project managers on construction job sites. The mobile app has the following requirements:

- \* The app must display partner information.
- \* The app must alert project managers when changes to the partner information occur.
- \* The app must display project information including an image gallery to view pictures of construction projects.
- \* Project managers must be able to access the information remotely and securely.

##### Security:

- \* VanArsdel must control access to its resources to ensure sensitive services and information are accessible only by authorized users and/or managed devices.
- \* Employees must be able to securely share data, based on corporate policies, with other VanArsdel employees and with partners who are located on construction job sites.
- \* VanArsdel management does NOT want to create and manage user accounts for partners.

#### Technical Requirements

##### Architecture:

\* VanArsdel requires a non-centralized stateless architecture for data and services where application, data, and computing power are at the logical extremes of the network.

\* VanArsdel requires separation of CPU storage and SQL services

Data Storage:

VanArsdel needs a solution to reduce the number of operations on the contractor information table. Currently, data transfer rates are excessive, and queue length for read/write operations affects performance.

\* A mobile service that is used to access contractor information must have automatically scalable, structured storage

\* Images must be stored in an automatically scalable, unstructured form.

Mobile Apps:

\* VanArsdel mobile app must authenticate employees to the company's Active Directory.

\* Event-triggered alerts must be pushed to mobile apps by using a custom Node.js script.

\* The customer support app should use an identity provider that is configured by using the Access Control Service for current profile registration and authentication.

\* The customer support team will adopt future identity providers that are configured through Access Control Service.

Security:

\* Active Directory Federated Server (AD FS) will be used to extend AD into Azure.

\* Helpdesk administrators must have access to only the groups of Azure resources they are responsible for. Azure administration will be performed by a separate group.

\* IT administrative overhead must be minimized.

\* Permissions must be assigned by using Role Based Access Control (RBAC).

\* Line of business applications must be accessed securely.

=====

You need to ensure that users do not need to re-enter their passwords after they authenticate to cloud applications for the first time.

What should you do?

**A.** Enable Microsoft Account authentication.

**B.** Configure Azure Active Directory Sync to use single sign-on (SSO).

**C.** Deploy ExpressRoute.

**D.** Set up a virtual private network (VPN) connection between the VanArsdel premises and the Azure datacenter. Set up a Windows Active Directory domain controller in Azure VM. Implement Integrated Windows authentication.

**Answer: B**

Explanation:

Single sign-on (SSO) is a property of access control of multiple related, but independent software systems. With this property a user logs in once and gains access to all systems without being prompted to log in again at each of them.

References: [http://en.wikipedia.org/wiki/Single\\_sign-on](http://en.wikipedia.org/wiki/Single_sign-on)

### **NEW QUESTION: 3**

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. The deployment contains the computers shown in the following table.

Configuration Manager is used to deploy operating system images and Windows updates. Configuration Manager is integrated with the Microsoft Deployment Toolkit (MDT). You install the Configuration Manager console on Computer1. You need to ensure that you can perform all of the management tasks for the deployment of Configuration Manager from Computer1. Which two actions should you perform on Computer1? Each correct answer presents part of the

solution.

**A.** Install MDT 2013.

**B.** Run the Configure ConfigMgr Integration tool.

**C.** Run the New Deployment Share Wizard.

**D.** Install the Windows Assessment and Deployment Kit (Windows ADK) for Windows 8.1.

**E.** Install the WSUS administration console.

**Answer: A,B**
