NEW QUESTION: 2
Which three statements accurately describe the Automated Installation (AI) client?
A. If a client system does not use any SC profile, then an interactive tool opens on that client at first boot after that client installation to complete the configuration of that client.
B. If the AI client does not match any criteria to use a custom manifest or script, the automated installation aborts.
C. Only the default.xmlfile is used as the default AT client manifest.
D. Any manifest or script in a service can be designated to be the default for that service.
E. If a client system does not use any SC profile, then the install server will use the default SC profile.
F. If the AI client does not match any criteria to use a custom manifest or script, the default manifest is used.
Answer: A,C,F
Explanation:
A: Each client uses one and only one AI manifest to complete its installation. The AI manifest is selected for a client according to the following algorithm:
* If no custom AI manifests are defined for this install service, the default AI manifest is used. The default AI manifest is not associated with any client criteria etc.
D: When you create a new install service, install_service_image_path/auto_install/manifest/default.xml is the initial default AI manifest for that install service.
E: Each client can use any number of system configuration profiles. If a client system does not

use any configuration profile, then an interactive tool opens on that client at first boot after that client installation to complete the configuration of that client.
