Up to date exam data.

NEW QUESTION: 1

When planning business analysis information management, what are the factors that influence storage and access decisions?

- A. Business rules and change strategy
- B. Organizational values and procurement strategy
- C. Business policies and methodology adopted
- D. Organizational standards and tool availability

Answer: D

Explanation:

Business analysis information can be stored in many ways. Storage decisions depend on many factors such as who must access the information, how often they need to access it, and what conditions must be present for access. Organizational standards and tool availability also influence storage and access decisions. The business analysis approach defines how various tools will be used on the initiative and how the information will be captured and stored within those tools. Tools may shape the selection of business analysis techniques, notations to be used, and the way that information is organized.

NEW QUESTION: 2
