- D. The 'Enable automatic password support' option must be enabled on the Provisioning services host
- E. The console user must be a member of the Domain Admins group
- F. The farm security must use Active Directory groups instead of local groups for authentication

Answer: A,C,D

NEW QUESTION: 2

Your company has multiple offices.

The network contains an Active Directory domain named contoso.com. An Active Directory site exists for each office. All of the sites connect to each other by using DEFAULTIPSITELINK.

The company plans to open a new office. The new office will have a domain controller and 100 client computers.

You install Windows Server 2016 on a member server in the new office. The new server will become a domain controller.

You need to deploy the domain controller to the new office. The solution must ensure that the client computers in the new office will authenticate by using the local domain controller.

Which three actions should you perform next in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

NEW QUESTION: 3
