### **NEW QUESTION: 4**

A FileMaker Pro 12 database is hosted by FileMaker Server 12. User A and User B are accessing the database at the same time. User A runs a script that loops over a set of records and makes changes to those records. During the time that the script runs, User B is editing one of the records that is also in User A's found set and is being acted on by User A's script.

Which statement is true about this situation?

- A. User A's script will make changes to all records in its found set except the record being edited by User B
- B. User A's script will stop looping when it reaches the record User B is editing, and will wait to continue until User B releases the record.
- C. When it reaches the record User B is editing, User A's script will stop if User A's script is running with Set Error Capture [On]. Otherwise User A will be prompted to either continue or cancel the running script.
- D. User A's script will stop looping when it reaches the record User B is editing.

**Answer: A**
