NEW QUESTION: 1

Your CTO is very worried about the security of your AWS account. How best can you prevent hackers from completely hijacking your account?

- A. Don't write down or remember the root account password after creating the AWS account.
- B. Use short but complex password on the root account and any administrators.
- C. Use AWS IAM Geo-Lock and disallow anyone from logging in except for in your city.
- D. Use MFA on all users and accounts, especially on the root account.

Answer: D

Explanation:

For increased security, we recommend that you configure multi-factor authentication (MFA) to help protect your AWS resources. MFA adds extra security because it requires users to enter a unique authentication code from an approved authentication device or SMS text message when they access

AWS websites or services.
