

## 2021 C1000-124 New Exam Cram | Accurate 100% Free C1000-124 Reliable Test Materials - Buildindustryastana

Buildindustryastana C1000-124 PDF and APP Test Engine are revised by the most professional C1000-124 expert team, IBM C1000-124 Test Book But we only provide explanations for those hard to understand questions and the others you can find answers from our exam pool, IBM C1000-124 Test Book We have three version free demos which are in accord with the complete dumps below, You get the chance to practice real C1000-124 test questions, exactly the ones you'll be getting in the real C1000-124 exam.

Prior to that graphics was a destination activity, where you'd specifically [New NS0-303 Exam Cram](#) plan to use an application and then go to the room with the computer in it, But as a puppy, we find its behaviors cute.

For Further Study: Detailed Model, Deals have to be negotiated, **C1000-124 Test Book** calls returned, and problems solved, How to begin designing your web apps as microservices, The new distribution channel of the New Digital Economy is [Reliable JN0-1362 Test Materials](#) what I call the three IPs—the Information Producer, the Information Provider, and the Information Packager.

Using Storage Cards, To play any of these [Exam A00-232 Demo](#) tracks, just launch the Xbox Music app and then click or tap the My Music heading, Although these design flaws are minor, [C1000-124](#) they begin to demonstrate the complexity that our designs could potentially hold.

### IBM Cloud Advocate v1 Latest Pdf Material & C1000-124 Valid Practice Files & IBM Cloud Advocate v1 Updated Study Guide

Work with remote teams to build your own personal business, Buildindustryastana C1000-124 PDF and APP Test Engine are revised by the most professional C1000-124 expert team.

But we only provide explanations for those hard to understand questions **C1000-124 Test Book** and the others you can find answers from our exam pool, We have three version free demos which are in accord with the complete dumps below.

You get the chance to practice real C1000-124 test questions, exactly the ones you'll be getting in the real C1000-124 exam, But dueto the difficulty of the actual test and interference **C1000-124 Test Book** of some trifles, people always postpone the study plan for the test preparation.

More importantly, the updating system is free for **C1000-124 Test Book** you, Before you buy, you can download our free demo which contains some of questions and answers in our dumps, It is a desktop software for practicing your C1000-124 exam dumps questions that is smartly designed by our experts team.

By compiling our C1000-124 prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect, In case, you fail in the C1000-124 exam, you may think your money spent on C1000-124 real dumps is wasted, but IBM is not that style.

### Guaranteed Success with IBM C1000-124 Dumps

Buildindustryastana is the best provider with high pass rate in C1000-124 exam dumps, Why not have a try, So your possibility of gaining success is high, Being qualified by C1000-124 certification is an important means of getting your desired job and the choice of promotion, so

you need to treat it seriously.

There are three versions of C1000-124 training dumps, you can buy any of them according to your preference or actual demand, Of course, passing the C1000-124 exam and get the certificate is just a piece of cake.

Virtual Exam - test yourself with C1000-124 exam questions with a time limit, But there are question is that how you can pass the C1000-124 exam and get a certificate.

Buildindustryastana is more than provider of learning materials: we are [IBM Cloud Advocate v1](#) an IT learning institution with strong expertise in eLearning, In the same time, you will do more than the people around you.

## **NEW QUESTION: 1**

Case Study: 5 - Dress4win

Company Overview

Dress4win is a web-based company that helps their users organize and manage their personal wardrobe using a website and mobile application. The company also cultivates an active social network that connects their users with designers and retailers. They monetize their services through advertising, e-commerce, referrals, and a freemium app model. The application has grown from a few servers in the founder's garage to several hundred servers and appliances in a collocated data center. However, the capacity of their infrastructure is now insufficient for the application's rapid growth. Because of this growth and the company's desire to innovate faster. Dress4Win is committing to a full migration to a public cloud.

Solution Concept

For the first phase of their migration to the cloud, Dress4win is moving their development and test environments. They are also building a disaster recovery site, because their current infrastructure is at a single location. They are not sure which components of their architecture they can migrate as is and which components they need to change before migrating them.

Existing Technical Environment

The Dress4win application is served out of a single data center location. All servers run Ubuntu LTS v16.04.

Databases:

MySQL. 1 server for user data, inventory, static data:

- \* - MySQL 5.8
- 8 core CPUs
- 128 GB of RAM
- 2x 5 TB HDD (RAID 1)

Redis 3 server cluster for metadata, social graph, caching. Each server is:

- \* - Redis 3.2
- 4 core CPUs
- 32GB of RAM

Compute:

40 Web Application servers providing micro-services based APIs and static content.

- \* - Tomcat - Java
- Nginx
- 4 core CPUs
- 32 GB of RAM

20 Apache Hadoop/Spark servers:

- \* - Data analysis
- Real-time trending calculations
- 8 core CPUs
- 128 GB of RAM

- 4x 5 TB HDD (RAID 1)

3 RabbitMQ servers for messaging, social notifications, and events:

\* - 8 core CPUs

- 32GB of RAM

Miscellaneous servers:

\* - Jenkins, monitoring, bastion hosts, security scanners

- 8 core CPUs

- 32GB of RAM

Storage appliances:

iSCSI for VM hosts

\* Fiber channel SAN - MySQL databases

\* - 1 PB total storage; 400 TB available

NAS - image storage, logs, backups

\* - 100 TB total storage; 35 TB available

Business Requirements

Build a reliable and reproducible environment with scaled parity of production.

\* Improve security by defining and adhering to a set of security and Identity and Access

\* Management (IAM) best practices for cloud.

Improve business agility and speed of innovation through rapid provisioning of new resources.

\* Analyze and optimize architecture for performance in the cloud.

\* Technical Requirements

Easily create non-production environment in the cloud.

\* Implement an automation framework for provisioning resources in cloud.

\* Implement a continuous deployment process for deploying applications to the on-premises

\* datacenter or cloud.

Support failover of the production environment to cloud during an emergency.

\* Encrypt data on the wire and at rest.

\* Support multiple private connections between the production data center and cloud

\* environment.

Executive Statement

Our investors are concerned about our ability to scale and contain costs with our current infrastructure. They are also concerned that a competitor could use a public cloud platform to offset their up-front investment and free them to focus on developing better features. Our traffic patterns are highest in the mornings and weekend evenings; during other times, 80% of our capacity is sitting idle.

Our capital expenditure is now exceeding our quarterly projections. Migrating to the cloud will likely cause an initial increase in spending, but we expect to fully transition before our next hardware refresh cycle. Our total cost of ownership (TCO) analysis over the next 5 years for a public cloud strategy achieves a cost reduction between 30% and 50% over our current model. For this question, refer to the Dress4Win case study. Dress4Win is expected to grow to 10 times its size in 1 year with a corresponding growth in data and traffic that mirrors the existing patterns of usage. The CIO has set the target of migrating production infrastructure to the cloud within the next 6 months. How will you configure the solution to scale for this growth without making major application changes and still maximize the ROI?

**A.** Implement managed instance groups for Tomcat and Nginx. Migrate MySQL to Cloud SQL, RabbitMQ to Cloud Pub/Sub, Hadoop to Cloud Dataproc, and NAS to Compute Engine with Persistent Disk storage.

**B.** Implement managed instance groups for the Tomcat and Nginx. Migrate MySQL to Cloud SQL, RabbitMQ to Cloud Pub/Sub, Hadoop to Cloud Dataproc, and NAS to Cloud Storage.

**C.** Migrate RabbitMQ to Cloud Pub/Sub, Hadoop to BigQuery, and NAS to Compute Engine with Persistent Disk storage. Deploy Tomcat, and deploy Nginx using Deployment Manager.

**D.** Migrate the web application layer to App Engine, and MySQL to Cloud Datastore, and NAS to Cloud Storage. Deploy RabbitMQ, and deploy Hadoop servers using Deployment Manager.

**Answer: A**

**NEW QUESTION: 2**

It is a kind of malware (malicious software) that criminals install on your computer so they can lock it from a remote location. This malware generates a pop-up window, webpage, or email warning from what looks like an official authority. It explains that your computer has been locked because of possible illegal activities on it and demands payment before you can access your files and programs again.

Which of the following terms best matches the definition?

- A. Adware
- B. Spyware
- C. Ransomware
- D. Riskware

**Answer: C**

Explanation:

Explanation/Reference:

Ransomware is a type of malware that can be covertly installed on a computer without knowledge or intention of the user that restricts access to the infected computer system in some way, and demands that the user pay a ransom to the malware operators to remove the restriction. Some forms of ransomware systematically encrypt files on the system's hard drive, which become difficult or impossible to decrypt without paying the ransom for the encryption key, while some may simply lock the system and display messages intended to coax the user into paying. Ransomware typically propagates as a Trojan.

**NEW QUESTION: 3**

Which Oracle Fusion Middleware product is required to enable single sign-on?

- A. Oracle Security Management
- B. Oracle Access Manager
- C. Oracle Identity Management
- D. LDAP
- E. Oracle Business Rules

**Answer: B**

Explanation:

Single Sign-On Options

Following are the options available for a single sign-on solution:

\*Use Oracle Access Manager 11g.

\*Use an existing Oracle Single Sign-On 10g 10.1.2.3.

\*Use an existing Oracle Single Sign-On 10g 10.1.4.3.

\*Install a new Oracle Single Sign-On 10g 10.1.2.3 as part of Oracle Identity Management 10g 10.1.2.3.

\* Install a new Oracle Single Sign-On 10g 10.1.4.3 as part of Oracle Identity Management 10g 10.1.4.3.

Note 1:

Oracle recommends that you consider upgrading to Oracle Access Manager 11g Single Sign on solution to take advantage of additional functionality and architecture.

Note2: Oracle Platform Security Services comprise Oracle WebLogic Server's internal security framework. A WebLogic domain uses a separate software component called an Authentication Provider to store, transport, and provide access to security data. Authentication Providers can

use different types of systems to store security data. The Authentication Provider that WebLogic Server installs uses an embedded LDAP server.

Oracle Fusion Middleware 11g supports new single sign-on solutions that applications can use to establish and enforce perimeter authentication:

\*Oracle Access Manager solutions \*Oracle Single Sign-On (OSSO) solution

Customers must carefully choose the solution appropriate to their needs. Selecting the right SSO solution requires careful consideration and depends upon your requirements

Reference: Oracle Fusion Middleware Application Security Guide 11g, Introduction to Single Sign-On in Oracle Fusion Middleware

#### **NEW QUESTION: 4**

Which three operations occur during a cold migration of a virtual machine? (Choose three.)

- A. The virtual machine files are quiesced prior to the migration.
- B. The virtual machine hardware is upgraded.
- C. The virtual machine is registered with the destination server.
- D. The virtual machine disks are moved if the datastore is being changed.
- E. The source virtual machine is removed from the old hosts.

**Answer: C,D,E**
