- A. Index 2
- B. Index 1
- C. Index 3
- D. Index 4

Answer: A,D

Explanation:

Erläuterung

Diese Images (da es sich um vollständige GUI und nicht um CORE handelt) enthalten die Binärdateien, die zur Installation aller GUI-Elemente erforderlich sind.

Bei der Installation von Windows Server 2012 R2 können Sie zwischen Server Core-Installation und Server mit einer grafischen Benutzeroberfläche wählen. Die Option "Server mit grafischer Benutzeroberfläche" entspricht Windows Server 2012 R2 der Option "Vollständige Installation", die in Windows Server 2008 R2 verfügbar ist. Mit der Option "Server Core-Installation" wird der Speicherplatz auf der Festplatte, die potenzielle Angriffsfläche und insbesondere die Wartungsanforderungen reduziert. Daher wird empfohlen, die Server Core-Installation zu wählen, es sei denn, Sie benötigen zusätzliche Benutzeroberflächenelemente und grafische Verwaltung Tools, die in der Option "Server mit GUI" enthalten sind. Aus diesem Grund ist die Server Core-Installation jetzt die Standardinstallation. Da Sie später jederzeit frei zwischen diesen Optionen wechseln können, besteht eine Möglichkeit darin, den Server zunächst mit einer GUI-Option zu installieren, den Server mithilfe der grafischen Tools zu konfigurieren und dann später zur Server Core-Installationsoption zu wechseln.
