NEW QUESTION: 1

Azure Event Gridに接続するカスタムAzure関数アプリを構築しています。

リソースが関数アプリに動的に割り当てられるようにする必要があります。請求はアプリの実行に基づいている必要があります。

関数アプリを作成するときに何を設定する必要がありますか？

- A. DockerコンテナとB1価格設定層を使用するApp Serviceプラン
- B. Dockerコンテナと、S1の価格設定を使用するApp Serviceプラン
- C. WindowsオペレーティングシステムとApp Serviceプランのホスティングプラン
- D. Windowsオペレーティングシステムと消費計画ホスティングプラン

Answer: D

Explanation:

Explanation

Azure Functions runs in two different modes: Consumption plan and Azure App Service plan.

The Consumption plan automatically allocates compute power when your code is running.

Your app is scaled out when needed to handle load, and scaled down when code is not running.

Topic 1, Contoso Ltd

Overview

Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market.

Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment

Currently, Contoso uses multiple types of servers for business operations, including the following:

- * File servers
- * Domain controllers
- * Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory.

You have a public-facing application named App1. App1 is comprised of the following three tiers:

- * A SQL database
- * A web front end

* A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements

Planned Changes

Contoso plans to implement the following changes to the infrastructure:

Move all the tiers of App1 to Azure.

Move the existing product blueprint files to Azure Blob storage.

Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements

Contoso must meet the following technical requirements:

* Move all the virtual machines for App1 to Azure.

* Minimize the number of open ports between the App1 tiers.

* Ensure that all the virtual machines for App1 are protected by backups.

* Copy the blueprint files to Azure over the Internet.

* Ensure that the blueprint files are stored in the archive storage tier.

* Ensure that partner access to the blueprint files is secured and temporary.

* Prevent user passwords or hashes of passwords from being stored in Azure.

* Use unmanaged standard storage for the hard disks of the virtual machines.

* Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

Minimize administrative effort whenever possible.

User Requirements

Contoso identifies the following requirements for users:

Ensure that only users who are part of a group named Pilot can join devices to Azure AD.

Designate a new user named Admin1 as the service administrator of the Azure subscription.

Ensure that a new user named User3 can create network objects for the Azure subscription.

NEW QUESTION: 2

Where is the rate-limit feature of the Converged Campus architecture limited?

A. uplink ports on the edge switches

B. access ports on the edge switches

C. inter Switch Trunk ports on the core switches

D. uplink ports on the core switches

Answer: A,B,D

Explanation:

We need to rate limit on access to avoid over utilisation by a single host/server as well as from access to upwards so there if there is some issue (broadcast storm or else) that should not be replicated to rest of switching cloud.

NEW QUESTION: 3

An application developer needs to refer to video presentations regarding new features in WebSphere Commerce for a business requirement. Where can these be found in the Information Center?

A. Tutorials

B. Samples

C. IBM Education Assistant

D. Developing

Answer: C

NEW QUESTION: 4

What is the danger associated with stopping a running job by using the STOP_JOB procedure?

- A. There is no danger in using the STOP_JOB procedure.
- B. All jobs within the job group will also be stopped.
- C. The job will need to be reenabled before it will execute again.
- D. The job may leave data in an inconsistent state.
- E. The job may hold locks on objects referenced within it.

Answer: D
